# INSIGHTS MEMO SUPERSTORE ANALYTICS DASHBOARD

**Objective:** Deliver concise, evidence-based insights from the Superstore Analytics Dashboard to guide short-term corrective actions and medium-term strategic focus.

**Key Insights:**

- **Sales concentrated in West Region**
  - Sum of Sales by Region donut (West=725.46K ~ 31.5% of sales).

- **High sales volumes driven by Technology and higher margins from Office Supplies.**
  - Total Sales by Segment/Category bars shows Technology leads sales,
  - Profit Margin% by Category shows Office Supplies with best margin.

- **Profit conversion is weak shown by large gap between sales and profit.**
  - Profit Bridge (2.30M sales and 0.29M profit) and overall Profit Margin 0.12.

- **Discounting negatively affects furniture profitability.**
  - Discount Vs Profit Scatter and Total Sales by Sub-Category (Furniture shows high discounts with low profit).

- **Returns are low overall but concentrated in durable goods.**
  - Return Rate% by Sub-Category (Machines, Table, Appliances highest) and Returned Orders = 296, Return Rate = 0.06%.

- **Logistics underperformance: low on-time shipping and multi-days deliveries.**
  - On-Time Shipping gauge (~22%) and Average Delivery Days = 4.0 days; Order count by delivery days shows many deliveries in 2-5 days bins.

- **Customer segments differ in returns and profitability.**
  - Return Rate% by Segment (Corporate and Consumer higher returns) and Profit by segment visuals (variation across segments).

- **Temporal deterioration after 2020.**
  - YoY Sales% by Year shows growth to 2020, decline in 2021 and Monthly YTD trend shows spike late 2019 then drop.

**Recommended Management Actions:**

1. **Logistics optimization program (immediate in 90 days).**
   - Target on-time shipping improvement via carrier SLAs, prioritize SKUs for faster fulfillment, and re-routing for key states (California, Colorado, Arizona where returns cluster).

Khushi Arora (2512041)

- Expected outcome: reduce returns related to delivery damage and lift repeat purchases later (On-time shipping gauge, Avg delivery days and Returned orders by State).

2. **Margin Protection and Product Strategy (Quarterly).**
   - Implement margin-aware discounting (limit discounts on low-margin categories like Furniture), increase focus and inventory for high-margin sub-categories (Office Supplies, Accessories, Copiers), and run A/B pricing pilots (Discount Vs Profit, Profit Margin% by Category).

3. **Implement Targeted Customer Loyalty & Retention Initiatives.**
   - Use segment wise performance insights to strengthen repeat purchases from high-value customers.
   - As the Customer segment contributes the highest sales volume, launch loyalty rewards, personalized offers, and feedback-based product improvements to retain profitable customers.

4. **Optimize Supplier & Inventory for Low-Margin, High-Return Categories.**
   - For product categories or sub-categories showing low profitability and higher return, reassess sourcing strategies and quality controls.
   - Improve vendor negotiations, tighten quality checks, and rationalize SKUs to minimize losses from returns.

**Conclusion:**

These insights reveal a clear path to lift probability by tightening discounting practices and improving logistics execution. The dashboard provides the necessary metrics to track progress against these actions and support rapid, data-driven decisions.
